# The Fulda Food-Manifesto

## Living and eating in harmony with nature

We wish to create awareness and we campaign and stand for ...

- **FOR** the preservation of the vital and active qualities of our foodstuffs and their tastes and for their enjoyment
- **FOR** honesty in the production of food (e.g. by no addition of flavouring enhancers)
- **FOR** the cautious and critical handling of new technologies in food (e.g. gene technology)
- **FOR** sustainable and ecological food production

What do we want to do together to ensure that in the future we have healthy and nourishing food?

- Foster public awareness of the need for the provision of accurate and objective information in relation to the important questions
- promote individual responsibility such as conscious choices when buying food
- choose healthy food by each purchase, every shopping list is a “vote”
- ensure sensible dealing with nature and animals

Everybody, particularly people in public office in the economy, politics and in field of culture can support this objective and ensure healthy food for the future. it is our aim for openness, transparency and honesty in the handling of food:

- to ensure that foodstuffs which are our vital basis, remain in harmony with nature!
- so that in the future our children should have healthy foodstuffs!
